Gökmen Görgen

Software Developer
Berlin, Berlin, Germany

Summary

I started programming by contributing to GNU / Linux distributions
then I involved in web projects with my Python experience. Later I
developed mobile and desktop applications. Now I am interested in
Blockchain technologies and Deep Learning.

Experience

Coachfrog AG
Lead Software Developer
October 2015 - Present
Zürich Area, Switzerland

I took on the role of team leader in a large project with multiple sub-projects.

Each project used different technical skills such as Go, Nodejs and Python.

The essential component of the project is a calendar and booking system.

Radity
Chief Technical Officer
July 2012 - Present
Istanbul, Turkey

We build tech startups, create digital products, deliver technology projects and
put together tailored development teams for startups and grownups. SwissLife,
Sherpany, and Coachfrog are some of the companies that we worked.

Markafoni
Software Developer
October 2011 - June 2012 (9 months)
Istanbul, Turkey

I worked in Zizigo ERP project for fixing errors, optimising code base, adding
new features, etc. My first task was to send a notification mail to the customers
about pending orders in Markafoni ERP. Also, I used Fabric for the deployment
commands and Sphinx for writing documentation.

Artistanbul PR
Software Developer

September 2009 - October 2011 (2 years 2 months)
Istanbul, Turkey

I started to work as a full-stack developer in a startup project named Mappiness (mappiness.com). We deployed all our web projects in Debian GNU / Linux servers. Other projects that I developed actively are ozgurlukicin.com, idata.com.tr, no3.com.tr.

TUBITAK
Software Developer (Intern)
August 2009 - October 2009 (3 months)

I developed an application named Puding for installing Pardus from the USB disk. I contributed PiSi package manager and maintained XFCE desktop environment.
